

### **Post DermaSweep Treatment Home Care Advisement**

**To ensure the best results with your DermaSweep Treatment, be sure to adhere to the following instructions:**

- Use your facial moisturizer for 3 - 7 days after treatment, or until your skin returns to normal. Apply twice daily or more often if skin is more irritated.
- You may experience redness, swelling, scabbing and flaking skin. This is normal.
- Avoid use of Alpha Hydroxy Acid products, Retin-A, masks, scrubs, facial waxing, or any other exfoliating products or treatments for 3 - 7 days or until your skin returns to normal.
- Use of cold compresses can provide relief from the windburn feeling.
- Do not pick, scratch or peel the skin.
- Avoid direct sun exposure and/or tanning beds after treatment.
- Use make-up as desired.
- Use sunscreen.
- Cleanse with your usual facial soap/cleanser.
- If treating hyperpigmentation, use of a lightening product is recommended.
- In the absence of irritation, you may begin using your prescribed homecare products or other Alpha Hydroxy Acid products in 3-7 days after treatment or when your skin returns to normal.

**If you experience any problems or have questions during the healing process, please contact us.**
